FROM LUXURY BOATING TO SWIMMING POOLS AND GARDENS

ARTISANAL CREATIONS, IN STEEL,
THAT LAST

This is the story of a group of Italian artisans sharing the passion for navigation and the sea. We are specialized in the production of accessories and equipments for luxury boating. A leading edge sector in Tuscany, especially in Versilia, that requires very specific technical skills and distinct artistic sensibility.

Creating products for luxury yachts means balancing attention to beauty and style with quality of materials and processes.

Our creations are all weatherized and are able to preserve their aesthetic and functional characteristics over time.

Versilia has always been a land of men able to look beyond the horizon with optimism in search of new opportunities. These experiences led to the idea of bringing ashore the artisanal passion for beautifully crafted and durable objects, which can decorate and enhance swimming pools and the most enchanting gardens.

Inoxstyle creates objects, unique in its genre, characterized by simple lines but at the same time elegant and sophisticated.

Artisanal creations, in steel, that last.

UNIQUE PRODUCTS FOR UNIQUE SPACES

We constantly work with the most esteemed architects and designers to be able to deliver unique products, which can be recognized and appreciated.

Co-design

We have developed co-design services ranging from custom drawing to joint design, specifically with designers and architects.

Customization

The products from the catalogue can be customized according to our customers' wishes. For example: logos or aesthetic elements engraving, coordinated with the space where the object is placed; decorative lighting.

Service and Maintenance

Naturally, such high quality products are supported by a service characterized by great efficiency and availability.

INOX
TYLE

HIGH-QUALITY MATERIALS AND ARTISANSHIP

UNRIVALED BEAUTY

Beauty, quality, uniqueness and durability. We base our products on these values. The showers design is unique and exclusive, developed in collaboration with architects and designers in order to deliver innovative and elegant products. The material is always and only **AISI 316L stainless steel**, in both body and screws.

Quality, durability and resistance to environmental agents are guaranteed because the oxidizable components are completely eliminated. The objects are made in a **single piece**. No block assembly or junctions. The absence of sharp edges, exposed to atmospheric elements, ensures sturdiness and durability, even in the most difficult environmental conditions, e.g. in the presence of brackish and chlorine. **Exposed screws are reduced to a minimum**. It is an aesthetic choice, which favors beauty, but also a functional choice to prevent oxidation, limestone or rust deposits.

Each object is treated with **mirror-like polishing, "Nautical" quality, manually done**. This technique makes it glossier, therefore more aesthetically appealing, and provides a longer durability being less susceptible to external agents. We use **top quality Italian hydraulic components**.

Each showerhead utilizes silicone rubber. This makes cleaning very easy due to the absence of limestone clogging. Each product can be equipped with **electronic faucet** with a timer function, to adjust the duration of the water stream. Aesthetically modern and pleasant, anti-tampering, enhanced by the pleasant hydro-massage function.

To facilitate the storage during the winter months, on many models we have implemented the option of a **quick connection base** to move the showers more easily. It also provides greater anti-vandal safety. We are open to the demands and needs of each customer. You can **customize** each model, change a few technical features or make incisions, even for lighting, in the body of the product.

LET'S DISCOVER
TOGETHER ALL THE
INOXSTYLE MODELS
FEATURES:

The design is unique and exclusive.

*The material is always and only
AISI 316L stainless steel.*

*The objects are made in a single
piece.*

*Exposed screws are reduced to a
minimum.*

*Each object is treated with mirror-
like polishing, "Nautical" quality,
manually done.*

*We use top quality Italian hydraulic
components.*

*Each showerhead utilizes silicone
rubber.*

*The faucet is electronic with a timer
function.*

*You can customize the body of each
shower and of each product with
engraved and illuminated writing.*

SOUNDS PERFECT

INTERLUDE

Outdoor shower. A shower with a single arched arm, with a rectangular cross section, with double recessed showerheads. Also available in a two arched arms version, with a rectangular cross section, opposite to each other, each with double recessed showerheads.

AESTHETIC and FUNCTIONAL CHARACTERISTICS

Shower completely made of AISI 316L stainless steel, in both body and screws.

Mirror-like polishing (“Nautical” quality, manually done): less vulnerable to the elements.

Product made in a single piece: no block assembly or junctions.

Showerhead with silicone rubber: anti-limestone and anti-obstruction.

Optional auxiliary water output with ½” metal nozzle.

UNIQUE ELEMENTS

Electronic faucet *with timer and hydro-massage functions. Aesthetically pleasant and anti-tampering.*

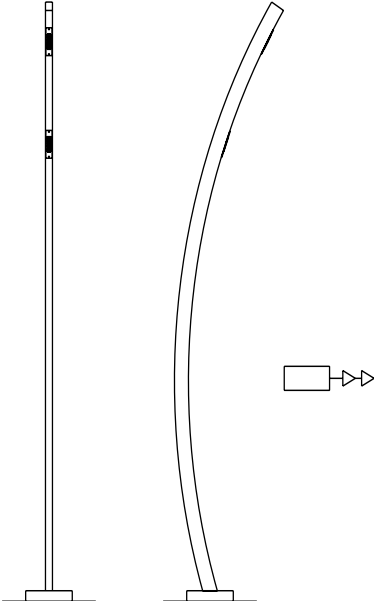

Dual showerhead *recessed into the shower body.*

Customization *(text or logos, lights) is possible upon request.*

INTERLUDE

Cod: 01.024

Name: Interlude shower

Description: Single arched arm, with a rectangular cross section, with dual showerheads.

Standard Configuration

2 showerheads - Body 60x30 mm

Showerhead on side 30 mm

Faucet: “Genius” electronic faucet [cod. 51.200]

Showerhead: Showerhead recessed into the body

Mounting: Visible technical screws

Measurements: Main body 30x60 mm, h 230 mm

Showerhead h 170 and 210 mm

Base 200x200 mm, h 40 mm

Materials: AISI 316L stainless steel, quick connection coupling system

Finish: Glossy, mirror-like manual polishing, “nautical” level quality

Hook-up: Water input 1/2”

Extra: Photocells columns

Alternative Faucets

- Mixer on external column h 80 cm 60x60 mm [cod. 51.011]
- “Stella” faucet on external column h 80 cm 60x60 mm [cod. 51.012]
- Floor mounted timed flow faucet [cod. 51.004]
- Timed flow faucet (on external column h 80 cm 60x60 mm) [cod. 51.013]

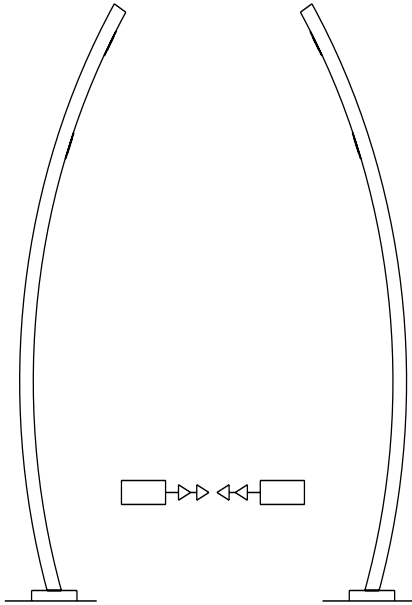

Options

- Satin finish [cod. 55.001]
- Telephone showerhead [cod. 53.001]
- Water service output 1/2” [cod. 56.001]

MELODY 4B

ARMONIA

Wave-shaped waterfall for swimming pool ledge, with a rectangular cross section.

AESTHETIC CHARACTERISTICS and FUNCTIONAL

Waterfall completely in stainless steel AISI 316L, in both body and screws.

Mirror-like polishing (“Nautical” quality, manually done): less vulnerable to the elements.

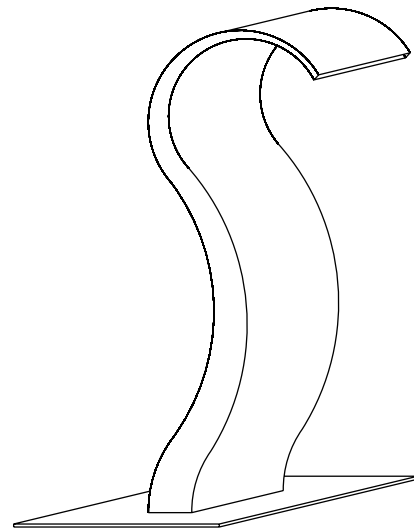

UNIQUE ELEMENTS

Customization, upon request, of the profile shape of the waterfall.

WATERFALL ARMONIA

Cod: 07.036

Name: Armonia Waterfall

Description: Wave-shaped waterfall for swimming pool ledge, with a rectangular cross section

Standard Configuration

Mounting: Visible mounting

Measurements: Main body 200x100 mm

Height tot. 65 cm - Aperture 200 mm

Base 300x200 mm

Materials: AISI 316L stainless steel

Finish: Glossy, mirror-like manual polishing, "nautical" level quality

Hook-up: Water input 2"

Options

• Satin finish

[cod. 55.001]

WATERFALL ARMONIA

YACHT
RIVA
AURORA

MARE NOSTRUM

YACHT

Outdoor shower. Single arched body, with oval cross section and integrated, fixed showerhead.
Also available in the version Beach&Garden with in-ground mounting, suitable for beaches and gardens.

AESTHETIC and FUNCTIONAL CHARACTERISTICS

Shower completely made of AISI 316L stainless steel, in both body and screws.

Mirror-like polishing (“Nautical” quality, manually done): less vulnerable to the elements.

Product made in a single piece: no block assembly or junctions.

Very few visible screws: reduction of components that are prone to oxidization and wonderful aesthetics.

Showerhead with silicone rubber: anti-limestone and anti-obstruction.

Optional auxiliary water output with ½” metal nozzle.

UNIQUE ELEMENTS

Electronic faucet with timer and hydro-massage functions.
Aesthetically pleasant and anti-tampering.

Faucet assembly produced exclusively for the shower.

Faucet fully integrated into the shower body. Smaller size and no limestone or rust deposits.

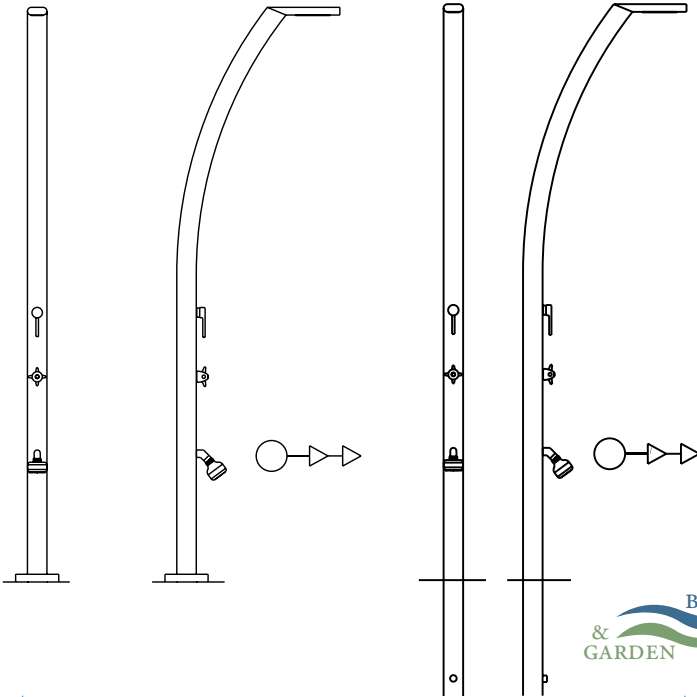

Possibility of quick connection base to more easily remove the shower. Easy storage in the winter months and tamper-proof security.

Customization (text or logos, lights) is possible upon request.
